About Us

The Manufacturing Project is an ISO 9001-certified original equipment manufacturer (OEM) and contract manufacturer, founded in 2025. We combine traditional manufacturing expertise with new-age technologies to deliver precision, scale, and innovation.

With over **30,000 sq. ft.** of industrial space in Hyderabad, TMP houses both **design** and **manufacturing capabilities**, enabling **end-to-end execution** from concept to finished product. To further enhance flexibility, we also collaborate with a network of trusted partner facilities, allowing us to **scale capabilities** and **capacity** as per project requirements while maintaining the highest standards of quality and reliability.

Manufacturing Capabilities

Depending on the needs of our customers, we operate as a contract, original equipment manufacturer. Our focus is on designing and manufacturing at-scale while maintaining quality.

Our current set of capabilities are below. We are consistently evaluating and adding new capabilities based on market demand, please contact us to learn more.

Aluminium Extrusions

Cutting and framing of aluminum extrusions.

Laser Cutting

Laser cutting of stainless steel, aluminum, and more.

Laser Cleaning

Laser cleaning of metal before powder coating.

Laser Welding

Laser welding of stainless steel, titanium, and more.

Powder, PU, PVD Coating

Powder, PU and PVD coating for stainless steel, and more.

CNC Machining

CNC bending, milling, turning, and more.

Assembly Of End Products

Assembly of devices, warehouses, and more.

Quality Control

Varied quality control processes.

Key Technologies and Machines

CNC 6kW & 2kW Fiber Laser Cutting Machines

Laser Welding - 1Kw, 1.5Kw, 2Kw

CNC Bending - Amada & Haco

Automatic double-head cutting machine (Aluminum and uPVC) - Perticing - Amada & Haco

CNC 6kW & 2kW Fiber Laser Cutting Machines

CNC Machining Center - milling, drilling, tapping and end milling (Aluminum and uPVC) - Pertici

Laser Cleaning and Powder Coating

PU Coating

Milling & Turning (Steel)
